

# Getting Started

## In this section

- [Initial Settings](#)
- [Understanding Lists and Groups](#)
- [Creating Email messages](#)
- [Always test before sending](#)
- [Maximizing deliverability for your emails](#)
- [Why does MailUp use vetting?](#)
- [.Getting Started v9.0.0](#)
- [.Getting Started v8.9.4](#)

## Sign up for a free trial

If you haven't already done so, you can [signup for a MailUp free trial here](#).

- No credit card is required and the process is fully automated: you can be up and running with your free trial in just a few minutes.
- You will receive an e-mail message from our system asking you to activate the free trial: look for that message: it should arrive within moments of you submitting the free trial request (check the spam folder in case an overzealous spam filter got in the way).
- Please note that the *free trial has sending limitations*.

## Log in and get started

Once your free trial account has been activated, it's time to log in and get started!

To login, visit [www.mailup.com](http://www.mailup.com).

Using the navigation on the left side...

1. Select *Settings > List settings > Preferences*  
[More on configuring your MailUp List settings](#)
2. To import recipients (if you already have some), use the handy import wizard.  
[More on importing contacts into MailUp](#)
3. Create a message and send a test mailing

## Design stunning emails with our **drag-and-drop editor**

Easily create beautiful, mobile-ready emails. Pick a template to get started.

START DESIGNING

### Or you can create the message:

Start from scratch. With the WYSIWYG editor you can insert links, images, tables, and also work on the HTML source code.

FROM SCRATCH

Start with a template and edit it as you wish. Some of the templates are mobile-ready (responsive design).

FROM A TEMPLATE

Upload an HTML file, and then edit it with the editor if needed.

FROM A FILE
