

Private Form Access Email

When the Private Form Access Email is Sent

The Private Form Access Email is sent when:

- A profile update form is set as "Private"
- Someone is provided with a link to the page
- They visit the page and receive a message indicating to check their mailbox to receive a link to access the form
- The form cannot be visited with the first link, and the second link (the one to actually access the form) is only sent to the email address specified in the first request.

When the visitor to the page first visits the page, they see a message such as this one:

In other words, the Private Form Access Email is sent to confirm that the person that fills out the form is indeed the person that has access to the email account specified.

How to Edit the Private Form Access Email

You can edit this email message by selecting *Profile Updates* from the *Marketing+* menu and then clicking on *Private Form Access Email*. The message is sent in the scenario described above.

Subject

Link to form to update your profile

Dyn. Fields

The screenshot shows an email editor interface. At the top, there is a subject line "Link to form to update your profile" and a "Dyn. Fields" button. Below this is a rich text editor toolbar with various icons for text formatting, alignment, and insertion. The main content area displays a preview of an email with the following text:

LINK TO UPDATE YOUR PROFILE

Here is the link that you need to use to update your profile.

[Click here to access the form](#)

Thank you!

[MailUp > Multi-channel marketing system](#)

At the bottom of the editor, there is a zoom control set to 100%.
