

Account settings

This section contains all the functions that allow you to modify and customise your platform.

You can manage your lists or create new ones, control the permissions of your users, search all your lists and manage many advanced features such as web services:

- [Create a new list or edit existing ones](#)
- [Search for a recipient across all lists](#)
- [Set account permissions](#)
- [Set account and contact details](#)
- [Create or edit custom fields](#)
- [Edit account-level style settings](#)
- [Access the Developer's Corner](#)

The changes you make in this section will apply to all your lists.
