## WS\_MailUpReport.ReportByUserEN method

Generates an XML response with statistics (bounces, clicks, opens) and personal data for the specified subscriber.

- **string** ReportByUserEN(**string** accessKey, **string** email, **int** listID, **int** messageID)
  - *accessKey*: access key obtained using the [LoginFromId](#) method, which must be used to authenticate all other calls
  - *email*: the e-mail address of the subscriber whose statistics are being requested
  - *listID*: the ID of the list to which the message belongs
  - *messageID*: the ID of the message for which statistics are being requested. If 0, all messages in the list will be included.

In the event that the status of the *e-mail* is unsubscribed, the statistics will not be returned.
